

Element Materials Technology Nummela

Precision calibration for
mission-critical environments.

We operate as a specialized calibration facility within Element's Metech network of state-of-the-art laboratories. Our team in Nummela helps clients maintain operational precision through expert calibration of electrical, temperature, and humidity equipment, delivering tailored solutions that minimize production disruption.

Our specialized expertise:

- **Advanced Electrical Calibration**

We specialize in precise calibration of electrical measurement instruments, ensuring accuracy and reliability for critical applications.

- **Temperature Calibration Excellence**

We provide meticulous temperature calibration services with traceability and precision across diverse operational requirements.

- **Humidity Measurement Verification**

Our specialized humidity calibration capabilities ensure environmental monitoring systems maintain optimal performance and accuracy.

- **Comprehensive Instrument Management**

Our consultancy, on-site support, and outsourcing services create complete instrument management solutions beyond basic calibration.

Why choose Element Nummela?

We deliver flexible calibration solutions precisely tailored to minimize operational disruption in your mission-critical environments. Our comprehensive range of services extends beyond laboratory calibration to include on-site support, consulting, and complete instrument management solutions. We combine technical excellence with practical flexibility, ensuring your measurement systems maintain accuracy without compromising productivity.

Success in numbers

As a key facility within Element's Metech network, we serve customers throughout Europe with consistently reliable calibration services. Our technical expertise in electrical, temperature, and humidity calibration has established us as a trusted metrology partner for organizations where measurement precision directly impacts operational success.

Take the next step

We're here to support your calibration needs with our specialized expertise.

Schedule a consultation to discuss your calibration requirements, or **request a quote** and experience our flexible, disruption-minimizing approach.

Accreditations and Approvals

We meet FINAS ISO 17025 standards for our calibration procedures, along with ISO 9001 and ISO 14001 certifications, demonstrating our commitment to quality and environmental responsibility.
